Education

UNIVERSITY OF ILLINOIS URBANA-CHAMPAIGN — Champaign, IL
Master of Computer Science — January 2026 – Present

THE CATHOLIC UNIVERSITY OF AMERICA — Washington, D.C.
Bachelor of Science in Computer Science — August 2014 – May 2018

Skills

Programming: JavaScript, TypeScript, Java, Python
Technologies & Tools: React, React Native, Tailwind, Shadcn, Jest, GraphQL, Figma, Datadog
Processes & Workflow: GitLab, Linear, JIRA
Languages: English (fluent), Polish (advanced)

Experience

TEAMWORKS — Remote
Senior Software Engineer — January 2024 – Present
Software Engineer — February 2022 – January 2024

- Led VPAT accessibility efforts across the company's flagship product Hub, coordinating with design, QA, and product to remediate 200+ issues and meet WCAG standards.
- Architected and delivered a WYSIWYG editor built on Tiptap, published as a shared package adopted across multiple codebases.
- Improved developer productivity by setting up a Hub Mobile release board, guidelines, and process, including a pipeline job that tracks merged changes ready for release from different teams. Also enabled parallel worktree environments for faster local development with AI across the team.
- Build and maintain a Shadcn-based shared component library as part of migration efforts away from Ant Design, improving UI consistency and reusability across products.
- Implement micro frontends using Module Federation to streamline integration across multiple applications.
- Deliver complex features across web and mobile using React and React Native, translating Figma designs into production-ready, accessible UI components.

BLACK CAPE — Arlington, VA
Technologist — October 2020 – February 2022

- Developed and maintained React web applications supporting classified government programs.
- Implemented interactive geospatial data visualizations and map-based interfaces using Mapbox to support analysis of operational datasets.
- Built data visualization interfaces for regional survey and sentiment datasets, enabling users to analyze trends and patterns across geographic regions.
- Created reusable React components using Material UI, improving UI consistency and maintainability throughout the application.

PYRAMID SYSTEMS — Washington, D.C.
Software Engineer — February 2019 – October 2020

- Developed and optimized features using Java and Oracle ADF for a case/workload management application supporting SEC staff in reviewing companies' financial filings.
- Improved application accessibility and resolved compliance issues, boosting usability for screen reader users.

Projects

TRAMBLE (TypeScript, Expo, React Native, NativeWind, Supabase) — August 2026

- Designed and shipped an iOS trip outfit planning app to the App Store with Expo and React Native. Architected offline-first editing with background Supabase sync and integrated Open-Meteo to fetch weather forecasts so users can plan outfits around upcoming conditions.

MARLINS TRACKER (TypeScript, Vite, React, Tailwind, Shadcn, MLB Stats API) — August 2025

- Built a web app to track the daily schedule of the Miami Marlins and all of their minor league affiliate teams in real time, pulling live game state, scores, and probable/winning pitchers from the MLB Stats API. Developed with React, TypeScript, Tailwind, and Shadcn for a UI that updates as games progress.

FOOD FAX (TypeScript, Vite, React, Tailwind, Shadcn, Recharts, Spoonacular API) July 2025

- Built a web app that visualizes nutrition data from user-generated inputs or the Spoonacular API. Developed with React, TypeScript, Tailwind, and Shadcn for a responsive UI, and used Recharts to display clear macro comparisons of calories, protein, fat, and carbs across selected foods.

Activities

ASSOCIATION FOR COMPUTING MACHINERY (ACM) Washington, D.C.
Member September 2016 – May 2018

- Participated in coding activities and worked on fun projects to better overall technical knowledge.
- Attended biweekly planning meetings to review progress and plan next tasks.

CATHOLIC UNIVERSITY MEN'S TENNIS TEAM Washington, D.C.
Starter August 2014 – May 2018

- Committed 15-20 hours per week to training and competing.
- Highlights: Team MVP 2016-17 & 2017-18, Team MIP 2015-16, Academic All-American 2017-18, 3x Athlete of the Week, 2x Second-Team All-Conference Singles, 1x First-Team All-Conference Singles, 1x Second-Team All-Conference Doubles
